Credit points

3

Prerequisites

36cp at 100 level or above including HLTH108 and (HLTH109 or MEDI203)

Corequisites

Co-badged status

Unit description

This unit will cover the basic principles of biomechanics and apply these to the analysis of human movement and the musculoskeletal system. This unit will integrate the student's understanding of mechanics with functional anatomy through the study of biomechanics of human locomotion (in two dimensions) including kinematics, kinetics, muscle function, work and power. The mechanics of tissues in the musculoskeletal system will also be introduced and discussed in the context of injuries and exercise prescription. The theoretical basis of methods for assessing movement, both quantitative and qualitative, will also be introduced enabling basic practical analysis of common movements to be performed.

Important Academic Dates

Information about important academic dates including deadlines for withdrawing from units are available at <https://www.mq.edu.au/study/calendar-of-dates>

Learning Outcomes

On successful completion of this unit, you will be able to:

Explain key terminology and basic biomechanical principles as they apply to human movement

Describe the biomechanical characteristics of walking and running in healthy people

Describe common adaptations to walking in people with health conditions

Demonstrate an understanding of how changes of movement patterns and techniques will influence the load on human tissues during movement

Discuss the mechanical properties of bones, muscles, tendons and ligaments

Analyse and interpret biomechanical data characterising human movement

Describe practical ways to measure common movements in a clinical and/or workplace settings

General Assessment Information

General Assessment Information

Information concerning Macquarie University's assessment policy is available at <https://staff.mq.edu.au/work/strategy-planning-and-governance/university-policies-and-procedures/policies/assessment>. Grade descriptors and other information concerning grading requirements are contained in Schedule 1 of the Macquarie University Assessment Policy.

To pass this unit, students must have:

- Made a serious attempt at all assessment tasks; **AND**
- Demonstrated sufficient evidence of achievement of the unit learning outcomes.

Further details for each assessment task will be available on iLearn, including marking rubrics.

All final grades in the Department of Health Professions are determined by the Faculty of Medicine and Health Sciences Assessment Committee, and are approved by the Faculty Board. They are not the sole responsibility of the Unit Convenor. Students will be awarded an Assessment Grade plus a Standardised Numerical Grade (SNG). The SNG is not necessarily a summation of the individual assessment components. The final grade and SNG that are awarded reflect the corresponding grade descriptor in Schedule 1 of the Assessment Policy.

Extensions for Assessment Tasks

Applications for assessment task extensions may be considered for short-term, unexpected,

serious, and unavoidable circumstances affecting assessment. Applications must be submitted via www.ask.mq.edu.au . For further details please refer to the Special Considerations Policy available at <https://staff.mq.edu.au/work/strategy-planning-and-governance/university-policies-and-procedures/policies/special-consideration>

Late Submission of Work

All assignments which are officially received after the due date, and where no extension has been granted by the Unit Convenor, may incur a deduction of 5% of the overall assessment weighting for the first day, and 5% for each subsequent day, including the actual day on which the work is received. Assessments received 5 days or more beyond the due date, without an approved extension, will be awarded a maximum of 50% of the overall assessment marks. Weekends and public holidays are included. For example:

Due Date	Received	Days Late	Deduction	Raw Mark	Final Mark
Friday, 14th	Monday, 17th	3	15%	75%	60%

Assessment Tasks

Name	Weighting	Hurdle	Due
Mid-Semester Quiz	20%	No	Week 6
Written Report	30%	No	Week 11 (COB Friday)
Written Exam	50%	No	Weeks 14/15/16

Mid-Semester Quiz

Due: **Week 6**

Weighting: **20%**

Students will complete an written quiz on campus during a specified period. This is an invigilated exam.

On successful completion you will be able to:

- Explain key terminology and basic biomechanical principles as they apply to human movement
- Describe the biomechanical characteristics of walking and running in healthy people
- Describe common adaptations to walking in people with health conditions
- Demonstrate an understanding of how changes of movement patterns and techniques will influence the load on human tissues during movement

- Discuss the mechanical properties of bones, muscles, tendons and ligaments
- Analyse and interpret biomechanical data characterising human movement
- Describe practical ways to measure common movements in a clinical and/or workplace settings

Written Report

Due: **Week 11 (COB Friday)**

Weighting: **30%**

Written group report with group and individual components (Movement Analysis)

On successful completion you will be able to:

- Demonstrate an understanding of how changes of movement patterns and techniques will influence the load on human tissues during movement
- Analyse and interpret biomechanical data characterising human movement
- Describe practical ways to measure common movements in a clinical and/or workplace settings

Written Exam

Due: **Weeks 14/15/16**

Weighting: **50%**

Written exam (2 hours)

On successful completion you will be able to:

- Explain key terminology and basic biomechanical principles as they apply to human movement
- Describe the biomechanical characteristics of walking and running in healthy people
- Describe common adaptations to walking in people with health conditions
- Demonstrate an understanding of how changes of movement patterns and techniques will influence the load on human tissues during movement
- Discuss the mechanical properties of bones, muscles, tendons and ligaments
- Describe practical ways to measure common movements in a clinical and/or workplace settings

Delivery and Resources

Unit Organisation

This is a three credit point unit run over a 13 week session. There are lectures and tutorials/ laboratories. Further information is available via the online Learning Management System (LMS)

iLearn <http://ilearn.mq.edu.au>

Assumed knowledge

This unit builds on your learning in the previous undergraduate units particularly in the area of Anatomy; In particular, HLTH108/9 or BIOL247.

Teaching and Learning Strategy

This unit will have a two hour lecture weekly and a two hour tutorial/laboratory fortnightly.

Attendance

In the Faculty of Medicine and Health Sciences professionalism is a key capability embedded in all our programs. As part of developing professionalism, Faculty of Medicine and Health Sciences students are expected to attend all small group interactive sessions including tutorials, clinical, and laboratory practical sessions. In most cases lectures are recorded; however, lecture recordings cannot be guaranteed and some discussion or content may not be available for viewing via the recording system.

All lectures and tutorials are scheduled in your individual timetable. The timetable for classes can be found on the University web site at: <http://www.timetables.mq.edu.au/>. You may make a request to your tutor to attend a different tutorial on a one-off basis for extenuating circumstances. Please note these may change throughout the semester and changes will be communicated through iLearn.

Failure to attend any learning and teaching activities, including lectures and tutorials, may impact your final results. It is the responsibility of the student to contact their tutor or the unit convenor by email to inform tutors if they are going to be absent.

Textbooks

The following textbook will be used in the teaching of this unit and the library hold an online copy of it:

Sports biomechanics: the basics: optimising human performance / Anthony J. Blazeovich, 2nd ed., A & C Black Publishers: London

Additionally the following text will be used to a lesser extent; the library also holds an online version:

Fundamentals of Biomechanics / Duane Knudson, 2nd ed., Springer US: Boston, MA

An interactive laboratory manual is available for purchase. Further details are provided on iLearn.

Readings

Readings may be referred to throughout the semester and a reference to these will be provided as needed.

Technology and equipment

On-campus

Teaching rooms are equipped with state of art audio-visual and ICT equipment including iPads, internet connection, high quality video cameras and multiple LCD screens.

Off-campus

To study optimally when off campus you will need to have access to a reliable internet connection to retrieve unit information & at times to submit assessment tasks via iLearn.

Unit Schedule

Lectures will be conducted every week. Note, most lectures will be provided online in lieu of a face to face lecture. The lectures in weeks 1, 6 (mid-sem exam), 9, and 12 are compulsory.

Laboratories will take place in Weeks 2, 4, 7, 8, 10, and 12 only.

This schedule is subject to change. Any changes will be communicated via iLearn.

Policies and Procedures

Macquarie University policies and procedures are accessible from [Policy Central](https://staff.mq.edu.au/work/strategy-planning-and-governance/university-policies-and-procedures/policy-central) (<https://staff.mq.edu.au/work/strategy-planning-and-governance/university-policies-and-procedures/policy-central>). Students should be aware of the following policies in particular with regard to Learning and Teaching:

- [Academic Appeals Policy](#)
- [Academic Integrity Policy](#)
- [Academic Progression Policy](#)
- [Assessment Policy](#)
- [Fitness to Practice Procedure](#)
- [Grade Appeal Policy](#)
- [Complaint Management Procedure for Students and Members of the Public](#)
- [Special Consideration Policy](#) (**Note:** *The Special Consideration Policy is effective from 4 December 2017 and replaces the Disruption to Studies Policy.*)

Undergraduate students seeking more policy resources can visit the [Student Policy Gateway](https://students.mq.edu.au/support/study/student-policy-gateway) (<https://students.mq.edu.au/support/study/student-policy-gateway>). It is your one-stop-shop for the key policies you need to know about throughout your undergraduate student journey.

If you would like to see all the policies relevant to Learning and Teaching visit [Policy Central](https://staff.mq.edu.au/work/strategy-planning-and-governance/university-policies-and-procedures/policy-central) (<https://staff.mq.edu.au/work/strategy-planning-and-governance/university-policies-and-procedures/policy-central>).

Student Code of Conduct

Macquarie University students have a responsibility to be familiar with the Student Code of Conduct: <https://students.mq.edu.au/study/getting-started/student-conduct>

Results

Results published on platform other than [eStudent](#), (eg. iLearn, Coursera etc.) or released directly by your Unit Convenor, are not confirmed as they are subject to final approval by the University. Once approved, final results will be sent to your student email address and will be made available in [eStudent](#). For more information visit ask.mq.edu.au or if you are a Global MBA student contact globalmba.support@mq.edu.au

Student Support

Macquarie University provides a range of support services for students. For details, visit <http://students.mq.edu.au/support/>

Learning Skills

Learning Skills (mq.edu.au/learningskills) provides academic writing resources and study strategies to improve your marks and take control of your study.

- [Workshops](#)
- [StudyWise](#)
- [Academic Integrity Module for Students](#)
- [Ask a Learning Adviser](#)

Student Services and Support

Students with a disability are encouraged to contact the [Disability Service](#) who can provide appropriate help with any issues that arise during their studies.

Student Enquiries

For all student enquiries, visit Student Connect at ask.mq.edu.au

If you are a Global MBA student contact globalmba.support@mq.edu.au

IT Help

For help with University computer systems and technology, visit http://www.mq.edu.au/about_us/offices_and_units/information_technology/help/.

When using the University's IT, you must adhere to the [Acceptable Use of IT Resources Policy](#). The policy applies to all who connect to the MQ network including students.

Graduate Capabilities

Creative and Innovative

Our graduates will also be capable of creative thinking and of creating knowledge. They will be imaginative and open to experience and capable of innovation at work and in the community. We want them to be engaged in applying their critical, creative thinking.

This graduate capability is supported by:

Learning outcomes

- Analyse and interpret biomechanical data characterising human movement
- Describe practical ways to measure common movements in a clinical and/or workplace settings

Assessment tasks

- Mid-Semester Quiz
- Written Report
- Written Exam

Discipline Specific Knowledge and Skills

Our graduates will take with them the intellectual development, depth and breadth of knowledge, scholarly understanding, and specific subject content in their chosen fields to make them competent and confident in their subject or profession. They will be able to demonstrate, where relevant, professional technical competence and meet professional standards. They will be able to articulate the structure of knowledge of their discipline, be able to adapt discipline-specific knowledge to novel situations, and be able to contribute from their discipline to inter-disciplinary solutions to problems.

This graduate capability is supported by:

Learning outcomes

- Explain key terminology and basic biomechanical principles as they apply to human movement
- Describe the biomechanical characteristics of walking and running in healthy people
- Describe common adaptations to walking in people with health conditions
- Demonstrate an understanding of how changes of movement patterns and techniques will influence the load on human tissues during movement
- Discuss the mechanical properties of bones, muscles, tendons and ligaments
- Analyse and interpret biomechanical data characterising human movement
- Describe practical ways to measure common movements in a clinical and/or workplace settings

Assessment tasks

- Mid-Semester Quiz
- Written Report
- Written Exam

Critical, Analytical and Integrative Thinking

We want our graduates to be capable of reasoning, questioning and analysing, and to integrate and synthesise learning and knowledge from a range of sources and environments; to be able to critique constraints, assumptions and limitations; to be able to think independently and systemically in relation to scholarly activity, in the workplace, and in the world. We want them to have a level of scientific and information technology literacy.

This graduate capability is supported by:

Learning outcomes

- Describe the biomechanical characteristics of walking and running in healthy people
- Describe common adaptations to walking in people with health conditions
- Demonstrate an understanding of how changes of movement patterns and techniques will influence the load on human tissues during movement
- Analyse and interpret biomechanical data characterising human movement
- Describe practical ways to measure common movements in a clinical and/or workplace settings

Assessment tasks

- Mid-Semester Quiz
- Written Report
- Written Exam

Problem Solving and Research Capability

Our graduates should be capable of researching; of analysing, and interpreting and assessing data and information in various forms; of drawing connections across fields of knowledge; and they should be able to relate their knowledge to complex situations at work or in the world, in order to diagnose and solve problems. We want them to have the confidence to take the initiative in doing so, within an awareness of their own limitations.

This graduate capability is supported by:

Learning outcomes

- Describe common adaptations to walking in people with health conditions
- Demonstrate an understanding of how changes of movement patterns and techniques will influence the load on human tissues during movement
- Analyse and interpret biomechanical data characterising human movement
- Describe practical ways to measure common movements in a clinical and/or workplace settings

Assessment tasks

- Mid-Semester Quiz
- Written Report
- Written Exam

Effective Communication

We want to develop in our students the ability to communicate and convey their views in forms effective with different audiences. We want our graduates to take with them the capability to read, listen, question, gather and evaluate information resources in a variety of formats, assess, write clearly, speak effectively, and to use visual communication and communication technologies as appropriate.

This graduate capability is supported by:

Learning outcomes

- Demonstrate an understanding of how changes of movement patterns and techniques will influence the load on human tissues during movement
- Analyse and interpret biomechanical data characterising human movement

Assessment tasks

- Mid-Semester Quiz
- Written Report
- Written Exam
