It considers in detail a wide variety of issues including general theories of ethics and also the nature and application of the mandatory accounting professional ethical framework. The unit explores a range of governance issues that must be understood by accountants, including corporate social responsibility, corporate law and competition and consumer law. 'Corporate social responsibility' aspects are wide-ranging and include environmental and social reporting and intergenerational concerns. Learning and Teaching Activities

Learning and Teaching Activities

Your class will meet on scheduled dates for a 3 hour seminar during the session. In between classes (and also in weeks where classes are not scheduled) you are required to continue your study and research and to work through the relevant modules in the CPA Subject Book and related content as well as work on assessment tasks. Check iLearn each week before class for any last minute changes to class content, times or locations. Please note that you must not change between classes of each lecturer as in any week classes may not be exactly in parallel as each lecturer will carry course progress in minor ways consistent with the professional needs of students in each class as well as due to the impact of public holidays on classes. In each class there will be a Lecture/Seminar on issues involving the relevant content from the CPA118 Ethics and Governance Subject Book Module topics. Lectures will last about 2 to 2.5 hours and, to lessen your in-class writing burdens, notes will be provided in advance on the iLearn system (formerly Blackboard). The address is www.ilearn.mq.edu.au. Students can access the Web site for ACCG913 from either their home/office or at University computers. In addition to lectures there will be in-class activities of various types, including assessed student work, for the balance of each 3 hour class period. For each module, PowerPoint lecture notes will be placed on iLearn before the class. They are NOT intended to, nor do they stand alone nor do they in any way replace compulsory lecture attendance and FULL READING OF THE CPA Modules. They are provided for your convenience. You must also properly construct your own notes based on your own readings and you are expected to note and record any additional comments, supplements and corrections to these notes. You are not entitled to rely on lecturer provided notes for full study purposes nor most importantly can they be taken as being a defined indicator of CPA exam content - you must learn fully from the CPA Australia Subject Book and related content to be sure of success in CPA Australia examinations. Please see the schedule of classes and topics which is provided in this Unit Guide and as the "Class Diary" in the Unit Assessment Guide.

Changes from Previous Offering

The unit syllabus has been updated in minor ways in relation to dates and content coverage.

There have been changes to the Assessments. Please refer to Assessment Guide S1_2019 for details of current assessments.

Research & Practice, Global & Sustainability

- **ACCG913 CPA Ethics and Governance identifies and requires the use of research sources and the practical application of sound academic approaches.** Multiple references are provided in the CPA Australia CPA Professional Program CPA118 Ethics and Governance Subject Book.
- Additional relevant materials, including materials expanding on CPA references, will be placed on iLearn and these will be referred to in classes and will also comprise content for class seminar discussion.
- The unit requires students to conduct their own relevant research activities. References, including to legal sources, are provided. In the context of developing 'lifelong learning'

skills it is important that students develop strong ability to conduct relevant systematic research. Effective Masters graduates must be able to identify research locations and construct targeted learning and experiential materials relevant to targeted needs.

- **ACCG913 CPA Ethics and Governance addresses global and sustainability issues as direct areas of study and as necessary implications arising from the materials, assessment and academic discussion and debate in classes/seminars.**
- We promote sustainability by developing an inherent ability in our students to research and locate relevant information within the accounting discipline generally and in particular within the critically important area of Ethics and Governance.
- The unit specifically addresses the application of sustainability concepts in a global context and in relation to the social, environmental and economic requirements of stakeholders and societies generally.
- By developing and fine-tuning this capability within students, we aim to provide skills which will benefit our graduates' careers and societies generally.
